MARKET SUMMARY AND MAJOR EVENTS IN THE MONTH OF MAY 2023

As we stated in our previous issue, Indian markets are at record all time high levels. Nifty broke previous high of 18887 in the last week of June 2023 and ended the month at an all time closing high of almost 19200. Sensex on the other hand is within the touching distance of 65000. Majority sectorial indices are also at their respective life highs. The bullish momentum that we are witnessing in our markets is on back of continuous gush of foreign money inflow owing to strong underlying fundamentals, macros and positive outlook for Indian economy. Month of June 2023 have seen net positive FII/ FPI inflow of more than Rs 27000 crores. Making this the second consecutive net monthly positive foreign inflow. With inflation cooling off, one can expect going forward our central bank can maintain status quo or start cutting rates, a move if happens can propel positivity in economic activities and further result in bullishness in markets.
