MARKET SUMMARY AND MAJOR EVENTS IN THE MONTH OF JULY 2023

Since April 2023, markets have rallied more than 8% year-to-date (YTD) helped by stable macroeconomic outlook and benign crude oil prices. Indices have made and all time high and not showing any fatigue yet. This rally to all time high is fuelled by positive foreign inflows. July is the fifth consecutive month of positive FII inflows into Indian equity market.

The Q4 earnings have also been encouraging indicating continued demand traction. The small and midcap indices have outperformed the larger benchmarks during the current quarter, lending strength to the trend of narrowing valuation differential.

When the market is driven by momentum, several stocks that aren't fundamentally very strong also tend to rise. This situation isn't specific to the month of July alone. Hence, investors must be cautious while investing and do the required analysis before making investment calls.
