MARKET SUMMARY AND MAJOR EVENTS IN THE MONTH OF AUG 2023

Since March 2023, the month of August marks the first month of net FII outflow in cash segment to the tune of Rs 20620 crs. Month witnessed minor sluggishness and sideways movement in major indices. Nifty started the month at levels of 19795, witnessed steady decline and closed at 19253. One of the major causes for the sluggishness in major global indices including ours is persistently raising inflation in US and other economies world over. Various commentaries from FED officials too added to the below par performance of our market. But going forward once the inflation subsides, market may resume its journey upward. Primary market is witnessing buoyancy with robust FPI inflows of over Rs 21000crs. Many primary issues are receiving healthy subscription.

Nifty - Summary (August 2023)
